BUSINESS MEMO

Operating Model Reset: Simplifying Delivery and Decision Rights

Prepared for Executive Committee and Business Unit Heads | 7 October 2026

Executive Committee and Business Unit Heads	Marcus Lee, Chief Operating Officer	Internal - Management	7 October 2026

Purpose

Reduce hand-offs, clarify accountability, and improve the speed with which priority client commitments move from decision to delivery.

> **Decision**
>
> Effective 1 November 2026, accountability for delivery will move to five end-to-end value streams.

What is changing

Five value streams will own delivery outcomes, with a single accountable executive for each stream.

1. Client Onboarding; Markets & Confirmations; Payments & Treasury; Data & Regulatory; Enterprise Platforms.
2. Each stream has one Executive Sponsor and one Value Stream Lead.
3. Project-level steering forums will be consolidated.
4. Core capabilities will be staffed as enduring teams.

Why now

- 37% of priority initiatives experienced delay from cross-team dependencies or unclear decision ownership.
- Five value streams create one accountable owner for each outcome.
- Persistent product teams reduce hand-offs and preserve delivery context.

5	37%	1 Nov 2026
VALUE STREAMS	PRIORITY DELAY	EFFECTIVE DATE

Execution plan

The transition will move from design to mobilisation and then into operating accountability.

Milestone	Action	Owner
Design	Confirm value-stream charters and decision rights	Executive Committee
Mobilise	Assign sponsors and value-stream leads	COO
Transition	Move accountability by 1 November 2026	Business Unit Heads

Required action

Leaders should confirm sponsors and value-stream leads before 1 November 2026.
